

WESTERN BRANCH DIESEL

Are Your Backup Systems Ready?

MISSION CRITICAL MAINTENANCE & SERVICE

Western Branch Diesel keeps you up and running

24 hour emergency response

Use of OEM parts for all brands

Qualified service technicians

Qualified electrical specialists

Available services include:

- NFP 110 load bank testing
- Switchgear maintenance and testing
- Docking station installation
- Equipment upgrades
- Rental generators up to 2 megawatts
- Diesel, gaseous, and CHP Systems
- 24 hour emergency response
- Service & maintenance for all brands and sizes of equipment
- Fire pump maintenance
- Equipment maintenance contracts 1-5 years (annual, semi-annual, and quarterly)

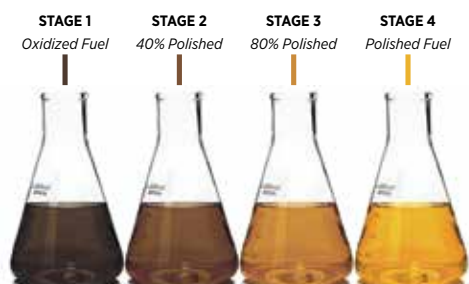

Don't let bad fuel bring you down

The case for fuel polishing

Diesel fuels are inherently unstable and subject to natural deterioration caused by water, oxidation, microbial growth, and chemicals. The result is poor fuel quality, sludge, and acids that can damage engine components and degrade performance. The process begins long before the fuel gets to your fuel tank as diesel fuel typically starts to deteriorate and form solids within 60-90 days after refining.

Common issues due to bad fuel:

- Poor starting or failure to start
- Low power from the engine
- Poor or rough idle
- Increased fuel consumption
- Excessive smoke
- Erratic RPMs
- Increased emissions

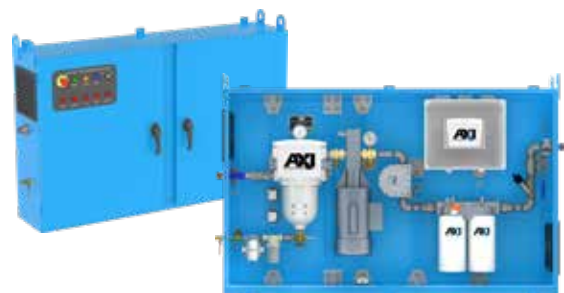

Complete fuel maintenance solutions

Western Branch Diesel has the knowledge and expertise to install any AXI International system on a wide variety of applications – from marine vessels to large scale fuel polishers for diesel fuel storage tanks and large back-up and off-grid diesel generator systems.

Our fuel services include:

- Fuel testing
- On-site fuel polishing
- Installed fuel polishing systems
- Fuel delivery
